80 Gold Mine Drive is a gem in Diamond Heights, designed by Kerman Morris Architects and built in 2014. This home stands out for its quality, with crisp, clean, contemporary lines throughout its spacious three-level layout. On the first floor, you'll find a sound-wired family room, a bathroom, a guest room, and direct access to a side-by-side 2-car garage. An elevator connects all three levels for added convenience to help navigate the vertical spaces. The second floor features two bedrooms, a bathroom, and the large primary suite, which offers a spa-like bath, a walk-in closet, and a balcony for outdoor relaxation. The third level is the heart of the home, with a great room boasting vaulted ceilings, a gas fireplace, and an open chef's kitchen with Thermador appliances and quartz countertops. Floor-to-ceiling Bonelli windows flood the space with natural light, highlighting the quality finishes, including engineered wide plank oak floors with radiant heat in three zones. The home also has air conditioning, a fire suppression system, and a security system. For easy entertaining, there are multiple deck spaces with sweeping city views. The side yard is perfect for a dog.
